

CERECONS Selected as a Finalist by Microsoft Healthcare Users Group MS-HUG Healthcare Innovation Awards of 2008

ANAHEIM HILLS, Calif., January 28, 2008 — Unlimited Innovations, Inc. (UIUS) is a software solutions provider serving clients both nationally and internationally through the use of Internet and related technologies. UIUS today announced that in collaboration with the Foundation for Medical Care of Tulare and Kings Counties, CERECONS -- the web-based, healthcare application developed by UIUS in order to more efficiently handle all aspects of patient care -- has been selected as a finalist in the MS-HUG Healthcare Innovation Awards of 2008. They are qualifying for award category: Clinical Records, Ambulatory focus.

In its eleventh year, the MS-HUG Healthcare Innovation Awards has become a distinguished opportunity for managed care organizations to display the progress healthcare is making via technology systems. MS-HUG reviews applicants with the overall goal of showcasing those organizations truly transforming patient care. To be chosen as a finalist is an important honor, as it already displays CERECONS' technological success in improving the state of healthcare management.

“We could not be happier to see that the work we have accomplished with the CERECONS team has been acknowledged as one of the top innovations in healthcare management today,” states Brandi Guinn, M.S., Administrator of Managed Care. “The benefits of CERECONS are clear in our everyday processes here at Foundation for Medical Care of Tulare & Kings Counties, and we are grateful to be working with this pioneering team. Gaining public recognition as a finalist and one of the top innovators in the world today is a highest honor and simply reinforces that we are indeed doing superior work.”

“From the beginning, CERECONS has been committed to the goal of surpassing the healthcare industry's typical technology,” states Rasheed Baqai, CERECONS Senior Product Manager. “Because we have been collaborating closely with medical professionals, we have gained a better understanding of improving coordinated health care. Our accomplishments have been an immense success, and our placement as a finalist in the MS-HUG Innovation Awards reveals the importance of this past year's work.”

The MS-HUG Healthcare Innovation Awards for 2008 will be announced in February at the annual HIMSS Conference that takes place in Orlando, Florida.
